

Domestic Violence & Abuse Partnership

The DVAP Children's Service offers support to children and young people who have experienced domestic abuse between the ages of 5-16. We offer help to children / young people who want someone to talk to, someone to listen or some advice.

Support can take place in different forms - some young people like to talk about what they have experienced or witnessed and work through how they are feeling. Some young people like to draw or write about how they are feeling.

The type of support offered is entirely dependent on individual need.

If you would like further information please contact one of the children's team on:
